jul 20 2013 it s the new constraint it specifies that t must not be abstract and must expose a public parameterless constructor in order to be used as a generic type argument for the

the new operator uses the internal construct method and it basically does the following initializes a new native object sets the internal prototype of this object pointing to the function prototype

it is not bad to use the new keyword but if you forget it you will be calling the object constructor as a regular function if your constructor doesn't check its execution context then it won't notice that this

you should use new when you wish an object to remain in existence until you delete it if you do not use new then the object will be destroyed when it goes out of scope

oct 4 2021 in the specific case of throw throw new is a shorthand for throw new exception the feature was introduced in c 9 and you can find the documentation as target typed new

jul 11 2013 note that if you declared it var a new and var o new object then there is one difference former is assignable only to another similar anonymous object while latter being object it

83 new describes a constructor signature in typescript what that means is that it describes the shape of the constructor for instance take new t you are right it is a type it is the type of a class

dec 11 2009 a new expression is the whole phrase that begins with new so what do you call just the new part of it if it's wrong to call that the new operator then we should not call sizeof the sizeof
